## WHY CHOOSE MONTANEL™?

In **1985**, Roland Mandler from **OptoTech in Germany** shook up the optical world by introducing **CNC (Computer Numerical Control) technology** to ophthalmic lens production. That's when **free form design** was born, and it's been a **game-changer** ever since. With **digital free form technology**, lenses can be **fine-tuned to 1/100 of a diopter**; that's **10 times more accurate** than conventional lenses!

## YOUR PATIENTS TRUST YOU.

### TRUST WHAT YOU PUT IN FRONT OF THEIR EYES

Available only through **AccuLab Optical**, **Montanel™ lenses** are crafted using **advanced OptoTech calculation design** and surfaced on **precision German-engineered OptoTech systems**. That combination results in **reduced astigmatism, faster adaptation, and better outcomes** for both your **patients** and your **practice's bottom line**.

## FEEL CONFIDENT IN EVERY LENS YOU DISPENSE

**Ditch the big brands. Hundreds of practices and countless patients** are already seeing the difference.
