WHY SHOULD I PERSONALIZE MY LENSES?

Personalization can make a big difference in prescription lenses. When a lens is fully personalized for a single wearer, the **best possible optics are achieved**. Each wearer will experience the best quality of vision and **unbeatable visual comfort**.

LENSES PERSONALIZED JUST FOR YOU!

Personalized lenses deliver superior comfort and great vision by using the most innovative technology available today. Personalized lenses are created **using your personal parameters**, individual frame selection, and prescription.

OptoTech's innovative technology ensures that each wearer has the most **comfortable and accurate vision**, which is individualized to create a unique lens made just for you.

Ask your optician about personalized lenses.

Montanel
Series Progressive Lenses

A TOTALLY PERSONALIZED
VISUAL EXPERIENCE

100% Digital Freeform Progressive with Compensated Technology. Our Premium Custom-Made Design with the Highest Resolution

RONDEL BENEFITS:

- Fully personalized progressive lenses
- Maximum visual quality throughout the lens
- Wide visual fields
- Comfortable and accurate vision
- Virtually non-existent adaptation

The Rondel progressive lens is **superior optical clarity** for the benefit of your patients. As AccuLab is continuously incorporating new OptoTech lens designs, we've introduced a **design with higher resolution that allows easy adaptation for every patient** due to an even **lower aberration** than previous designs.

100% Digital Freeform Progressive. Customized Performance for Daily Life

KBAR BENEFITS:

- Digitally surfaced using OptoDesign Pro technology
- Superior vision to traditional progressive lenses
- Comfortable all-purpose lens
- Accurate vision
- High-value economic solution

A long day in the office, some sports later on, and checking the internet afterwards - modern life has high expectations for our eyes. The daily demands of the digital age require lenses that can keep up. The KBar progressive from AccuLab offers **wide vision for all areas** and a **comfortable transition between near and far vision** resulting in an outstanding comprehensive visual experience. The KBar enables a **natural field of vision** while still **allowing the ability to read small, digital information**. No matter your lifestyle, the KBar will exceed your expectations.

An Occupational Lens with Premium **Soft Design** for an Incredible **Open View**

STILETTO BENEFITS:

- Fully personalized indoor occupational lenses
- Less eyestrain and improved vision
- Increased agility for precise focus
- Extended zones exclusively for intermediate and reading

With its **flexible inset to adjust the reading zone**, the Stiletto progressive lens design offers **improved vision, especially for hyperopia**. Soft does not necessarily mean a larger reading zone, but a **softer, less notable peripheral cylinder aberration**.

The Premium **Entry** and **Drive** Design Occupational Lens

LANCCE BENEFITS:

- Fully personalized outdoor lenses
- Reduced visual fatigue
- High quality features in the distance region
- Clear vision in every gaze direction

The Lance progressive lens design was **developed to increase the visual zones** with a concentration of unwanted astigmatism into the smaller areas of the lens surface. Additionally, it is possible to **use the inset for reading** as a variable. This is necessary for the two converging eyes to meet in the near vision zone. This also depends on the dioptric power.
