

FEATURES

Vario-Flex

The Vario-Flex feature lets you **combine different lens designs and fine-tune their unique characteristics**. With this powerful tool, you can smoothly control the width of the distance, intermediate, and near vision zones. This revolutionary feature offers **unmatched flexibility in design customization** and makes it possible to create truly personalized lens designs for each wearer. You can use Vario-Flex to customize an existing lens design or blend multiple parameters to create an entirely new product.
