MAX
POLY

BluTech MAX offers the highest level of blue light filtration of any lens in our collection. It features a proprietary formulation offering more complete near-clear blue light protection without distorting color. Available in Finished Single Vision lenses.

When to wear your MAX blue light glasses?

- With your contact lenses
- At home
- In the office
- Tired eyes
- Anywhere with bright lights

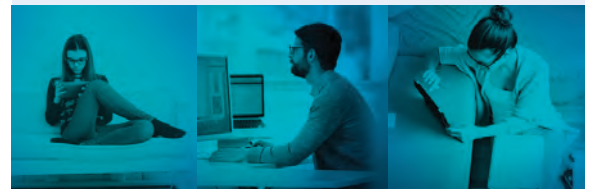

BluTech Wearer Survey

98.2% Noticed "Significant sleep improvement"

99.1% Eyes "More relaxed indoors"

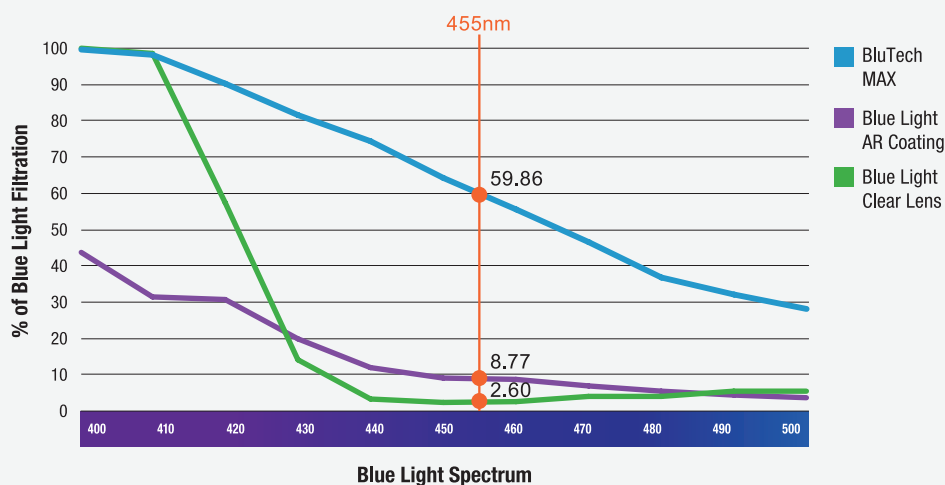

65.1% "Significant reduction migraines/headaches"

93.8% Absolute "Yes" to wear as everyday pair of glasses.

Protection Where It Matters

At 455nm the peak wavelength emitted by digital devices, BluTech offer 6 times more blue light filtration than the leading blue-light AR coating; and 23 times more than the leading blue-light clear lens.

Transmittance data provided by Dr. Wade Jeffrey, Director of the Center for Environmental Diagnostics and Bioremediation – University Of West Florida.
