

ACCULAB™  
Montanel

## FEATURES

### FRAMEblending

---

**FRAMEblending® technology** helps optimize both high-plus and high-minus lenses. By factoring the frame shape directly into the lens calculation, plus prescriptions can be made up to **30% thinner at the center**. For minus prescriptions, the lens edges can be blended to **precisely control thickness**. This eliminates the need for additional rolling or polishing to improve frame fit and cosmetics.
